You will see this screen with a list of licenses assigned to your email, Full Licenses or Trial Licenses, the list of PC activated and deactivated.

Also you will have another email with your serial keys.

Click on "Download button" to download the software or download from this address

http://www.macrogenerator.net/Software/Setup_MacroGenerator2.exe

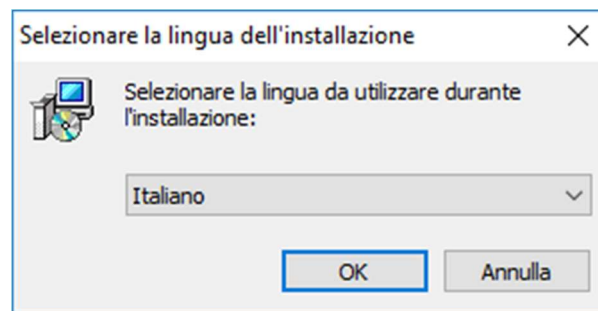

Or go to the download page <https://macrogenerator.azurewebsites.net/Download>

3.2 Installation

Once the file is downloaded, double-click the Setup icon

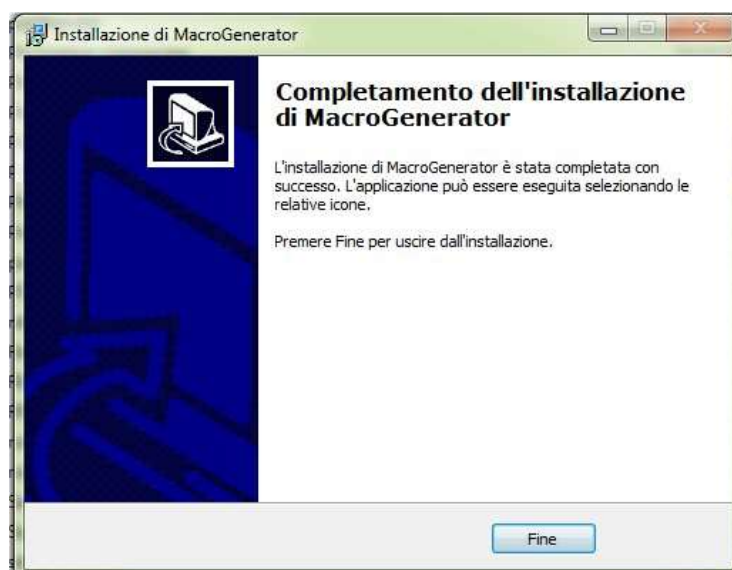

We select the language that interests us

And click ok

Click on Install

And then Finish

At this point, we find two icons on your Desktop,

Attention !!! the 64-bit application is used to control the 64-bit applications,

the 32-bit application is used to control the 32-bit applications.

Currently the majority of applications are 64-bit.

3.3 - Activation

MG to work needs the internet connection, for the activation and for the normal operation.

The trial version of MG 21 days from activation.

Once installed MG launch the software, you will see the registration window where you have to enter the email with which you created your account on the official website and the serial received via email.

Registration Form

Please enter your email and Serial Number received by email

Mail

Serial Number

To get a serial number for MacroGenerator2 click on the link below!

<https://macrogenerator.azurewebsites.net>

Press OK and if everything is correct you will not receive error messages.

To change a serial MG functioning just go to the menu and select "Enter Serial Number".

When a new PC is activated you receive a mail, if you do not find her look at the "Spam" or "Junk Mail "

MacroGenerator 2.0 - Pc Activated

Hi, Walter Iermano

you have activated the PC : PCWALTER-8700K\Walter

with the serial 7B28-A434-DF62-43D3

and the mail walteriermano@gmail.com

this is the activation number 01

Best Regards

Walter Iermano

Check Your Licences

MacroGenerator 2.0

The email contains a serial number of the activated PC, the software is licensed to run on a PC and with a limit of 5 activations automatically without problems, if you need the sixth activation must contact support by MG support@macrogenerator.net to make reset licenses.

3.4 - Update

To run the MG update just run easily the downloaded setup file.

This file automatically performs installation and upgrade without overwriting previous settings.

3.5 - Uninstall

To Uninstall MG launch unins000 files shown

This PC > Local Disk (C:) > Program Files > MacroGenerator > uninstall				
	Name	Date modified	Type	Size
ss	unins000.dat	4/8/2017 3:01 AM	DAT File	46 KB
ls	unins000	4/8/2017 3:01 AM	Application	700 KB
ts	unins000.msg	4/8/2017 3:01 AM	MSG File	13 KB

Or via the Windows tool

Both procedures uninstall only the software but not created any workspace, this not to lose any macros created and saved backup.

3.6 - Run as Administrator

MG is not a plug-in inside, but it is an external plug-in, this means that it is a software that goes to command another software, some Antivirus, some security systems, they could see MG as a suspect software, then lock it, for this reason, you must install it as Administrator if you do not install as Administrator, run the macro may not work.

Also on the first connection to the Tablet could have box of Firewall that blocks the MG connection with the Tablet or Smartphone, so you have to give consent to the firewall for MG.
